Terms of Service

Delivery Policy

Upon receipt of your order, the services will be performed to you in accordance with the terms applicable to the services that you purchased. The nature of the services you purchased and the date of your purchase may impact the timing of the performance of the services. The services will be deemed to be successfully delivered to you upon the performance of the services. Delivering a number usually occurs within a couple of seconds, however, there may be periods when the range of services provided is greatly reduced due to the ability of providers to provide numbers of the respective countries. In this case, you can create a request to the support service for a comment about when the corresponding service will become available. Up-to-date information about the availability and availability of services is presented in the left menu and is updated every 5 minutes 24 hours a day, 7 days a week.
